REPORT NO.

A. Certain areas are recognized by the industry as inaccessible and/or for other reasons not inspected. These included but are not limited to: inaccessible and/or insulated attics or portions thereof, attics with less than 18" clear crawl space, the interior of hollow walls, spaces between floor or porch deck and the ceiling below, areas where there is no access without defacing or tearing out lumber, masonry or finished work; areas behind stoves, refrigerators or beneath floor coverings, furnishings, areas where encumbrances and storage, conditions or locks make inspection impractical, portions of the subarea concealed or made inaccessible by ducting or insulation, area beneath wood floors over concrete, and areas concealed by heavy vegetation. Areas or timbers around eaves, (second story or above) that cannot be reached without the use of extension ladder. They were visually inspected from ground level only. Although we make visual examinations, we do not deface or probe window/door frames or decorative trims. Unless otherwise specified in this report, we do not inspect fences, sheds, dog houses, detached patios, detached wood decks, wood retaining walls or wood walkways. We assume no responsibility for work done by anyone else, for damage to structure or contents during inspection, or for infestation, infection, adverse conditions or damage undetected due to inaccessible or non-disclosure by owner/agent/tenant.

B. Slab floor construction has become more prevalent in recent years. Floor covering may conceal cracks in the slab that will allow infestation to enter. Infestations in the walls may be concealed by plaster so that a diligent inspection may not disclose the true condition. These areas are not practical to inspect because of health hazards, damage to the structure; or inconvenience. They were not inspected unless described in this report. We recommend further inspection if there is any question about the above noted areas. Ref: Structural Pest Control Act, Article 6, Section 8516(b), paragraph 1990(i). Amended effective March 1, 1974. Inspection is limited to disclosure of wood destroying pests or organisms as set forth in the Structural Pest Control Act, Article 6, Section 8516(b), Paragraph 1990-1991.

C. A re-inspection will be performed, if requested within four (4) months from date of original inspection, on any corrective work that we are regularly in the business of performing. If CERTIFICATION is required, then any work performed by others must be CERTIFIED by them. There is a re-inspection fee.

D. This company is not responsible for work completed by others, recommended or not, including by Owner. Contractor bills should be submitted to Escrow as certification of work completed by others.

E. The exterior surface of the roof was not inspected. If you want the water tightness of the roof determined, you should contact a roofing contractor who is licensed by the Contractor's State License Board.

F. TESTING

F. Second story stall showers are inspected but not water tested unless there is evidence of leaks in ceiling below. Ref: Structural Pest Control Rules and Regulations, Sec. 8516G. Sunken or below grade showers or tubs are not water tested due to their construction.

G. During the course of or after opening walls or any previously concealed areas, should any further damage or infestation be found, a supplementary report will be issued. Any work completed in these areas would be at Owner's direction and additional expense.

H. During the process of treatment or replacement it may be necessary to drill holes through ceramic tiles or other floor coverings; These holes will then be sealed with concrete. We will exercise due care but assume no responsibility for cracks, chipping or other damage to floor coverings. We do not re-lay carpeting.

I. We assume no responsibility for damage to any Plumbing, Gas or Electrical lines, etc., in the process of pressure treatment of concrete slabs or replacement of concrete or structural timbers.

J. When a fumigation is recommended we will exercise all due care but assume no responsibility for damage to Shrubbery, Trees, plants, TV Antennas or Roofs. A FUMIGATION NOTICE will be left with, or mailed to the Owner of this property, or his designated Agent. Occupant must comply with instructions contained in Fumigation Notice. During fumigation and aeration, the possibility of burglary exists as it does any time you leave your home. Therefore, we recommend that you take any steps that you feel necessary to prevent any damage to your property. We also recommend that you contact your insurance agent and verify that you have insurance coverage to protect against any loss, damage or vandalism to your property. The company does not provide any onsite security except as required by state or local ordinance and does not assume any responsibility for care and custody of the property in case of vandalism, breaking or entering.

K. Your termite report and clearance will cover EXISTING infestation or infection which is outlined in this report. If Owner of property desires coverage of any new infestation it would be advisable to obtain a Control Service Policy which would cover any new infestation for the coming year.

L. If you should have any questions regarding this report, please call or come by our office any weekday between 8:00 a.m. and 5:00 p.m.

M. I agree to pay reasonable attorney's fees if suit is required by this COMPANY to enforce any terms of this
