DEAR CUSTOMER,

Note on plumbing leaks: Depending upon soil conditions, severity of the leak, and other factors, Leaks Can Travel. The general location is outlined in this report. However, this area should be considered a starting point. Additional forensic work may be needed to track down or pinpoint the exact leak location during the repair process. The work best performed by contractors familiar with pool & spa leaks and contractors who have the equipment and knowledge to track down leaks. Additionally, it is the utmost importance that once an obvious leak is identified and repaired, the plumbing should be retested prior to backfill to ascertain if additional leaks exist or the integrity of the plumbing is sound.

Thank You

Leak Specialists
