Property Disclosure Summary

Section 1103 of the California Civil Code mandates the disclosure of six (6) natural hazard zones if the Property is located within any such zone. Those six "statutory" hazard zones are disclosed on the Natural Hazard Disclosure ("NHD") Statement ("NHDS") on the preceding page. Note that the NHDS does not provide for informing buyers if a property is only partially within any of the delineated zones; therefore, a FEMA flood certificate is included if any portion of the parcel is within a Special Flood Hazard Area. This Report also discloses hazards identified by county and/or city officials in the Safety Element of their jurisdiction's General Plan.

Below is a summary of the property disclosures in this Report. Farther below, discussion sections explain each disclosure, place the determination in perspective, and give buyers additional information they may need in the decision-making process. The disclosures are grouped according to hazard category. In each category, the hazard identifies the government authority responsible for the disclosure requirement, statutory map, or relevant hazard data (state, county or city). Disclosure determinations (e.g., IN or NOT IN) are parcel specific. Where a governing agency describes a hazard but has not evaluated or mapped a hazard zone in the Public Record, a usable map is not available and "Map N/A" is reported. Often, a hazard zone mapped in a city (or county) General Plan is identical to county (or state) hazard zones disclosed elsewhere in the Report; those redundant local disclosures are cited in the *Public Records Searched* at end of Report (see "Public Records not Repeated or Reported"), as is the data source for each disclosure.

200-Year Floodplain and 200-Year Riverine Flood Zones

California Senate Bill 1278/Assembly Bill 1965 Urban Level of Flood Protection Informational Maps

PUBLIC RECORD(S) SEARCHED: “Senate Bill 1278/Assembly Bill 1965 Urban Level of Flood Protection Informational Maps” produced by the California Department of Water Resources ("DWR").

DETERMINATION:

Senate Bill 5 ("SB 5"), which was enacted in 2007, authorized the DWR to develop maps displaying 100- and 200-year floodplains for areas located within the Sacramento-San Joaquin (SAC-SJ) Valley watershed. "Sacramento-San Joaquin Valley" means any lands in the bed or along or near the banks of the Sacramento River or San Joaquin River, or any of their tributaries or connected therewith, or upon any land adjacent thereto, or within any of the overflow basins thereof, or upon any land susceptible to overflow therefrom. The Sacramento-San Joaquin Valley does not include lands lying within the Tulare Lake basin, including the Kings River.

SB 5 requires that these maps contain the best available information on flood hazards and be provided to cities and counties in the SAC-SJ Valley watershed. This effort was completed by DWR in 2008. In 2012, the State legislature amended SB 5 requirements through SB 1278 and Assembly Bill (AB) 1965.

SB 1278 (“Planning and zoning: flood protection: Sacramento-San Joaquin Valley”) stipulated that on or before July 2, 2013, for the purpose of providing information to cities and counties necessary for their determinations relating to level of flood protection, the DWR shall release flood plain maps that identify at a minimum the facilities of the State Plan of Flood Control (“SPFC”) and the available data as to the water surface elevation of flooding in urban areas in the event of the failure of the facilities of the SPFC during flooding that has a 1-in-200 chance of occurring in any given year.

Within 24 months of July 2, 2013, each city and county within the Sacramento-San Joaquin Valley shall amend its general plan to contain (and zoning ordinances to address) the locations of flood hazard zones, including, but not limited to, “locations of undetermined risk areas” by no later than July 2, 2016. An “undetermined risk area is one “presumed to be at risk during flooding that has a 1-in-200 chance of occurring in any given year unless deemed otherwise by the SPFC, an official National Flood Insurance Program rate map issued by the Federal Emergency Management Agency, or a finding made by a city or county based on a determination of substantial evidence by a local flood agency.”

That same year companion legislation, California Assembly Bill 1965, defined the term “urban level of flood protection” to mean “the level of protection that is necessary to withstand flooding that has a 1-in-200 chance of occurring in any given year using criteria consistent with, or developed by, the DWR.”

The DWR was required to release informational 200-year floodplain maps for urban areas protected by the SPFC. These maps are specifically intended to assist cities and counties protected by the SPFC in their determinations relating to urban level of flood protection. According to DWR these informational maps cover the following jurisdictions:

- City of Chico (Butte County)
- City of Yuba City (Sutter County)
- City of Marysville (Yuba County)
- City of Davis (Yolo County)
- City of Woodland (Yolo County)
- City of West Sacramento (Yolo County)
- City of Merced (Merced County)
- Sacramento Metropolitan Water District (including City of Sacramento and City of West Sacramento)
- Stockton Metropolitan Area (City of Stockton and City of Lathrop)

Please note:

- These jurisdictions or other may choose to develop, use, or adopt 200-year floodplain maps which depict boundaries different from those depicted in the Public Record.
- Local planning, public works, or other agencies of these or other communities may choose to develop, use, or adopt other 200-year flood depth of inundation maps; however, the floodplain boundaries of these depth of inundation zones may not be the same as those depicted in the Public Record.
- The 200-year floodplain boundaries depicted in the Public Record are different from those identified in the “Sacramento and San Joaquin River Basins Comprehensive Study” produced by the U.S. Army Corps of Engineers (“USACE”) in 2002 and made publicly available by DWR.

Reporting Standards: “IN” shall be reported if any portion of the Property is located within a “200-Year Floodplain” or a “200-Year Riverine Flood Zone” as mapped in the Public Record. “NOT IN” shall be reported if no portion of the Property is located within a “200-Year Floodplain” or a “200-Year Riverine Flood Zone” as mapped in the Public Record. Please note this determination relies on official digital data of specified floodplain zones made publicly available by DWR.
