Subject: Sunrun Full Prepayment vs. System Purchase: [CUSTOMER ADDRESS] [thread::z9qUmudOdq6qf91cWUffAwM::]

The Sunrun logo is displayed in white text on a dark blue rectangular background. The word "SUNRUN" is written in a bold, sans-serif font, with the "S" and "R" being significantly larger than the other letters.

RE: 1207 Capitola St, Grover Beach, CA, 93433

Hi ,

Thank you for contacting us in regard to getting more information and pricing for a full prepayment or system purchase. Below, you'll find additional details about our prepayment and purchase options and the associated costs.

Full Prepay: \$11,767.07

- This option allows you to pay off the solar energy for the entire term, eliminating monthly payments to Sunrun. You will only receive charges from your utility company for any consumption beyond what the system produces.
- Sunrun will continue to monitor and maintain the system as needed. For example, if the system stops communicating, we will troubleshoot remotely or send a technician if necessary.
- Our performance guarantee remains in place (if applicable). If the system produces less electricity than outlined in Exhibit A, Sunrun will refund your account for the difference based on the refund rate.

Partial Prepay at Close of Escrow:

- If you're interested in this option, please contact your service transfer coordinator for more details.

- Partial prepayment allows you to reduce either your kWh rate, your monthly payment, or adjust/remove the annual increase. All other terms of your agreement will remain unchanged.

Purchase: \$16,271.90

- With this option, you will own the system outright as a fixture of the property. No monthly payments are due to Sunrun, and you will only be charged by your utility company usage beyond what the system generates.
- The system comes with the manufacturer's warranty, generally lasting around 10 years, with the potential to purchase extended coverage from the manufacturer. Note that the warranty is limited in scope. For repairs, you can hire a technician or request a service visit from Sunrun for a fee.
- While Sunrun will monitor the system until the meter stops working, you may choose to purchase third-party monitoring to track production independently.
- **Please Note:** The performance guarantee is not included with a system purchase, as we will no longer proactively monitor the system.

Please note that Sunrun bills in arrears, and there will be a final invoice due in addition to your full prepayment or purchase quote. Please note: Proof of title is required to close a transfer case.

If you would like to proceed with any of these options or modify your solar agreement, please notify your service transfer coordinator. They will send the necessary documents for signature and payment.

Feel free to contact me if you have any questions about the solar service transfer process.

Case Number 17472454

Best Regards,
ElizabethR
