Property Disclosure Summary

Section 1103 of the California Civil Code mandates the disclosure of six (6) natural hazard zones if the Property is located within any such zone. Those six "statutory" hazard zones are disclosed on the Natural Hazard Disclosure ("NHD") Statement ("NHDS") on the preceding page. Note that the NHDS does not provide for informing buyers if a property is only partially within any of the delineated zones; therefore, a FEMA flood certificate is included if any portion of the parcel is within a Special Flood Hazard Area. This Report also discloses hazards identified by county and/or city officials in the Safety Element of their jurisdiction's General Plan.

Below is a summary of the property disclosures in this Report. Farther below, discussion sections explain each disclosure, place the determination in perspective, and give buyers additional information they may need in the decision-making process. The disclosures are grouped according to hazard category. In each category, the hazard identifies the government authority responsible for the disclosure requirement, statutory map, or relevant hazard data (state, county or city). Disclosure determinations (e.g., IN or NOT IN) are parcel specific. Where a governing agency describes a hazard but has not evaluated or mapped a hazard zone in the Public Record, a usable map is not available and "Map N/A" is reported. Often, a hazard zone mapped in a city (or county) General Plan is identical to county (or state) hazard zones disclosed elsewhere in the Report; those redundant local disclosures are cited in the *Public Records Searched* at end of Report (see "Public Records not Repeated or Reported"), as is the data source for each disclosure.

ADDENDUM

PROPERTIES DELINEATED BY "DASHED LINES" ADVISORY

The County of Los Angeles and certain municipalities in Southern California have selectively decided to interpret and enforce Government Code Section 66412.6(b) as requiring a certificate of compliance (COC) or a conditional certificate of compliance be issued on properties where the boundaries are delineated by "dash-lines" (e.g. "---") rather than solid lines. Accordingly, some local governmental agencies are requiring a COC/approval be obtained as a condition to the issuance of a building permit for any new construction and/or other government approval for the improvement of the property.

Many properties were created either by tract/parcel maps under the direct supervision of local government entities or the Subdivision Map Act (beginning in the early 1970s) at the time the block or subdivision was developed, however, there are still many properties which were subdivided by original or subsequent owners via a grant deed without obtaining the requisite compliance certificate/approval. For example, there are many large residential parcels which at some point in time were divided by an owner, the owner simply had a surveyor draw up a legal description for the portion to be divided off and then recorded a grant deed conveying title to that portion, without review and approval by the applicable county or city planning/building department which is now "determining the legality" of those land divisions for an "after-the-fact" fee.

The simplest way to determine if a property fails to comply with this requirement is to review the assessor parcel map of the subject parcel. If the map shows a solid line boundary for the property, the county is taking the position that the parcel complies with the government code section. If the map shows a dashed line, the county is asserting that the property never received the proper COC/approval and now requires "after the fact" approvals by the applicable governmental agency. To verify compliance, a buyer may want to check with the local governing county/city planning department to verify that the property conforms to their interpretation of the law. For properties located within unincorporated areas of Los Angeles County, the county's Land Division Research Section will answer this question at (213) 974-6458.

If no COC/approval has been obtained, or if the county/city is requesting "finalization" of a previously divided property, the planning departments of the applicable county or city have applications to obtain a COC to comply with their mandates. At this time Los Angeles County charges approximately \$750 to provide the COC/approval. This fee may vary for properties located within other jurisdictions.

Buyers and Sellers are advised to seek professional or legal counsel regarding these issues.
