Estimate 2579

DATE 01/27/2026

DATE	ACTIVITY	QTY	RATE	AMOUNT
	Findings Summary During inspection, the existing 1,000-gallon fiberglass septic tank was found to have failed due to excessive soil cover above the tank. The depth of burial exceeds manufacturer recommendations and industry standards for fiberglass tanks, which has caused structural stress and tank failure. The tank is currently buried too deep to allow safe or proper access to internal components for inspection.			
	Leach Line Inspection Status At this time, the leach (dispersal) lines could not be inspected due to: The excessive depth of the tank. Because of these conditions, a full functional inspection of the leach field is not possible until we can excavate down to tank and remove risers to gain access to the outlet baffle.			
	Services Our company recommends Install new 1000 gallon poly septic tank, connect to one main house sewer line.			7,200.00
	Install septic tank riser to bring septic tank lid within 12" of dirt grade.			
	Services Install 60' of EZ-Flow leach lines and connect to new septic tank.			5,800.00

DATE	ACTIVITY	QTY	RATE	AMOUNT
	Leach Line Contingency If the leach lines do not require replacement, the customer will receive a refund or credit for the portion of the estimate related to leach line replacement only. If deficiencies are found, recommendations will be provided prior to any additional work.			
	Septic pumping and septic certification are included in the price. If job does not get completed the owner will owe a balance for septic pumping and inspection fee that was completed on 1/27/26.			
	Owner responsible:Owner Responsible Owner responsible for all permits, fees and inspections	1	0.00	0.00
	Changes ANY CHANGES must be in writing and agreed upon by all parties. (ie; email correspondence, additional/separate estimate/work order/US Mail)	1	0.00	0.00
