Important definitions

Rotating outage blocks are subject to change without advance notice due to operational conditions.

The electricity portion of your bill contains a Base Services Charge that funds essential services and infrastructure. To learn more, visit **pge.com/baseservicescharge**.

Wildfire Fund Charge: Charge on behalf of the State of California Department of Water Resources (DWR) to fund the California Wildfire Fund. For usage prior to October 1, 2020, this charge included costs related to the 2001 California energy crisis, also collected on behalf of the DWR. These charges belong to DWR, not PG&E.

Power Charge Indifference Adjustment (PCIA): The PCIA is a charge to ensure that both PG&E customers and those who have left PG&E service to purchase electricity from other providers pay for the above market costs for electric generation resources that were procured by PG&E on their behalf. 'Above market' refers to the difference between what the utility pays for electric generation and current market prices for the sale of those resources. Visit www.pge.com/cca.

Wildfire Hardening Charge: PG&E has been permitted to issue bonds that enable it to recover more quickly certain costs related to preventing and mitigating catastrophic wildfires, while reducing the total cost to its customers. Your bill for electric service includes a fixed recovery charge called the Wildfire Hardening Charge that has been approved by the CPUC to repay those bonds. The right to recover the Wildfire Hardening Charge has been transferred to a separate entity (called the Special Purpose Entity) that issued the bonds and does not belong to PG&E. PG&E is collecting the Wildfire Hardening Charge on behalf of the Special Purpose Entity. For details visit: www.pge.com/tariffs/assets/pdf/tariffbook/ELEC_PRELIM_JF.pdf.

Recovery Bond Charge/Credit: Your bill for electric service includes a charge that has been approved by the CPUC to repay bonds issued for certain costs related to catastrophic wildfires. The Recovery Bond Charge (RBC) rate is currently $0.00857 per kWh. PG&E has also contributed certain amounts to a trust fund which is used to provide a customer credit equal to $0.00857 per kWh (Recovery Bond Credit). The right to recover the RBC has been transferred to one or more Special Purpose Entities that issued the bonds and does not belong to PG&E. PG&E is collecting that portion of the RBC on behalf of the Special Purpose Entities.

Gas Public Purpose Program (PPP) Surcharge. Used to fund state-mandated gas assistance programs for low-income customers, energy efficiency programs, and public-interest research and development.

Visit www.pge.com/billexplanation for more definitions. To view most recent bill inserts including legal or mandated notices, visit www.pge.com/billinserts.

Explanation of Calculations

Your YTD Estimated NEM Charges represents the total charges for energy used, net of any credits for energy exported to the grid.

NEM Charges are calculated each month but are not billed until the end of the True-Up period. This True-Up process allows you to use credits generated in a given month to offset charges across other months within the True-Up period, which is typically 12 billing cycles. Your Summary of NEM Charges will be reset to zero at True-Up.

The Minimum Delivery Charge is billed monthly and credited at True-Up if the total NEM Charges Before Taxes are greater than your cumulative Minimum Delivery Charges.

Energy Charges are basic commodity costs related to energy usage. These charges will only be billed at True-Up if they are a positive amount and when the total NEM Charges Before Taxes are less than the sum of your total Minimum Delivery Charges and Energy Charges.

This is your YTD balance. Your total NEM Charges will be reconciled on your True-Up statement **(05/2026)**.

YTD NEM Charges Before Taxes	$988.11
Total Electric Minimum Delivery Charges	-119.36
Estimated Taxes	50.11

Please contact the Solar Customer Service Center at 1-877-743-4112 for questions about your NEM charges.

NEM Charges Before Taxes

Monthly NEM Charges
Monthly NEM Charges represent the cost of the electricity you use each month. You don't pay your monthly NEM balance each month. Instead, your Monthly NEM Charges are added up to calculate your Cumulative NEM balance, which you pay at True-Up.

Cumulative NEM Balance by Month

Cumulative NEM Balance
Cumulative NEM balance is a running total of your electricity costs and can increase or decrease depending on each month's use and generation. You only pay your Cumulative NEM balance at True-Up, and based on program rules, customers do not receive payment for a negative cumulative NEM balance.

Important Messages (continued from page 1)

Tier 1/Baseline allowance: Some residential rates are given a Tier 1 baseline allowance - a CPUC approved percent of average customer usage during summer and winter months. Your Tier 1/Baseline allowance provides for basic needs at an affordable price and encourages conservation. Your allowance is assigned based on the climate where you live, the season and your heat source. As you use more energy, you pay more for usage. Any usage over your baseline allowance will be charged at a higher price.

The gas summer Tier 1 (baseline) season begins on April 1. Your total Tier 1 quantities shown were calculated using your daily summer baseline allowance starting April 1 and your daily winter baseline allowance for any days in your billing period before April 1.
