Important definitions

Rotating outage blocks are subject to change without advance notice due to operational conditions.

Tier 1/Baseline allowance: Some residential rates are given a Tier 1/Baseline allowance - a CPUC approved percentage of average customer usage during summer and winter months. Your Tier 1/Baseline allowance provides for basic needs at an affordable price and encourages conservation. Your allowance is assigned based on the climate where you live, the season and your heat source. As you use more energy, you pay more for usage. Any usage over your baseline allowance will be charged at a higher price.

Wildfire Fund Charge: Charge on behalf of the State of California Department of Water Resources (DWR) to fund the California Wildfire Fund. For usage prior to October 1, 2020, this charge included costs related to the 2001 California energy crisis, also collected on behalf of the DWR. These charges belong to DWR, not PG&E.

"PG&E" refers to Pacific Gas and Electric Company, a subsidiary of PG&E Corporation. © 2025 Pacific Gas and Electric Company. All rights reserved.

Electric Charges

How Your True-Up is Calculated

This is your True-Up statement. You are being billed for your total NEM Charges Before Taxes minus your total electric Minimum Delivery Charges in addition to any applicable charges and taxes.

Since this is your **True-Up statement**, all electric usage charges and credits are reset to zero starting with your next billing cycle.

The Minimum Delivery Charge is billed monthly and credited at True-Up if the total NEM Charges Before Taxes are greater than your cumulative Minimum Delivery Charges.

Energy Charges are basic commodity costs related to energy usage. These charges will only be billed at True-Up if they are a positive amount and when the total NEM Charges Before Taxes are less than the sum of your total Minimum Delivery Charges and Energy Charges.

Net Surplus Compensation (NSC): This credit occurs on the True-Up statement only if the system has exported to the grid more energy than it imported from the grid during the overall 12-month billing cycle. The NSC is based on that month's market price for energy (see current calculation under **Credit for Net Surplus Compensation (NSC)** below).

The True-Up calculations are:

Total NEM Charges Before Taxes	\$306.42
Total Electric Minimum Delivery Charges	-144.38
Total NEM Charges	\$162.04

Please contact the Solar Customer Service Center at 1-877-743-4112 for questions about your NEM charges.

Monthly NEM Charges

Monthly NEM Charges represent the cost of the electricity you use each month. You don't pay your monthly NEM balance each month. Instead, your Monthly NEM Charges are added up to calculate your Cumulative NEM balance, which you pay at True-Up.

Cumulative NEM Balance by Month

Cumulative NEM Balance

Cumulative NEM balance is a running total of your electricity costs and can increase or decrease depending on each month's use and generation. You only pay your Cumulative NEM balance at True-Up, and based on program rules, customers do not receive payment for a negative cumulative NEM balance.

The State Mandated Non-Bypassable Charge (NBC) is calculated based on your energy usage and is relevant to determine the True-Up amount. This charge includes the following fees: Public Purpose Programs, Nuclear Decommissioning, Wildfire Fund Charge and Competition Transition Charge. The NBC Net Usage Adjustment is to ensure that you don't pay for NBCs twice.

As a customer who receives electricity directly from PG&E, a portion of your electric charges currently includes the Power Charge Indifference Adjustment (PCIA). To learn more, review page 2 of this Energy Statement or visit www.pge.com/cca.
