QUANTITY	PRODUCT / SERVICES DESCRIPTION	UNIT PRICE	TOTAL
	Attic Cleaning and Insulation Replacement, we removed the old insulation, debris, rodent droppings, and garbage in the attic. We'll leave the attic three weeks without insulation to make sure there's no rodent activity. Lastly, we'll install the new insulation, R30. Helps keep the house cool when hot outside and warm when cold.		
	Rat Proofing, we sealed and patched any possible entries that could have been like holes, gaps, and apertures in the attic, crawlspace, bathrooms, around the roof, and kitchen of the house. We sanitized the attic and crawlspace to neutralize any bacteria or hazard left behind by rodents. Once the job was complete we set up traps strategically in certain points of the house. We'll visit three times to check the traps and if there are any dead rodents in them we'll dispose of them and set up new traps. We replaced all the vents and crawlspace access doors.		
	PLUS Five Year Warranty For The Rat Proofing		

Notes:

PAID INSTALLMENT #1 FOR \$10,675
CHECK # 527

SUB TOTAL	\$
