Room Measurements

Only major rooms are listed. Some listed rooms may be excluded from total interior floor area (e.g. garage). Room dimensions are largest length and width; parts of room may be smaller. Room area is not always equal to product of length and width.

Main Building

MAIN FLOOR 2

Bath: 4'11" x 7'3" | 36 sq ft
Bedroom: 10'2" x 9'4" | 92 sq ft
Dining: 7'2" x 9'7" | 69 sq ft
Kitchen: 10'7" x 9'7" | 84 sq ft
Laundry: 5' x 7'3"
Living: 13'9" x 13'9"
Primary: 9'1" x 11'6" | 104 sq ft

MAIN FLOOR 1

Bath: 8' x 4'11" | 39 sq ft
Bedroom: 11'7" x 13' | 134 sq ft
Kitchen: 9'6" x 11'1" | 99 sq ft
Living: 12'3" x 16'1" | 195 sq ft
Primary: 11'8" x 10'3" | 120 sq ft

Garage

SEPARATE GARAGE

Garage: 11'5" x 19'3" | 220 sq ft

Floor Area Information

Floor areas include footprint area of interior walls. All displayed floor areas are rounded to two decimal places. Total area is computed before rounding and may not equal to sum of displayed floor areas.

Floor plans and square footage measurements provided by Turnkey Media Agency are captured using iGUIDE laser measurement technology and calculated in accordance with the ANSI Z765-2021 standard for single-family residential buildings. Measurements are believed to be accurate within industry-standard tolerances ($\pm 1\%$) but are not guaranteed. Buyers and their agents should independently verify all measurements material to their decision. Turnkey Media Agency is not a licensed surveyor or appraiser, and this floor plan should not be used as a substitute for a formal survey or appraisal.

iGUIDE Method of Measurement

Definitions

Interior Area is a per floor calculation, made by measuring to the inside surface of the exterior walls. The footprint of all interior walls and staircases is typically included.

Excluded Area is a sum of the area of all rooms (measured to the inside surface of room walls) that are excluded from the Interior Area for a floor and the footprint of corresponding walls. Prescribed area exclusions can vary from region to region. Examples of exclusions are spaces open to below, garages, cold cellars, crawl and reduced height spaces.

Exterior Wall Footprint is the sum of the estimated area of the perimeter wall segments bounding both Interior and Excluded Areas.

Exterior Area is a per floor calculation, made by measuring to the outside surface of the exterior walls and is represented by the sum of the Interior Area and the Exterior Wall Footprint.

Grade is the ground level at the perimeter of the exterior finished surface of a house. A floor is considered to be above grade if its floor level is everywhere above grade.

Total Interior Area is the sum of all Interior Areas.

Total Excluded Area is the sum of all Excluded Areas.

Total Exterior Area is the sum of all Exterior Areas.

Finished Area is a per floor calculation made by adding all enclosed areas in a house that are suitable for year-round use based upon their location, embodying walls, floors, and ceilings and which are similar to the rest of the house. Footprint of walls is attributed to finished area only when the walls are bounding finished areas.

Unfinished Area is a per floor calculation made by adding all enclosed areas that do not meet the criteria for Finished Area. Exceptions are outdoor and non-walkable areas, for example porches or areas open to below. Footprint of walls is attributed to unfinished area only when the walls are exclusively bounding unfinished areas.

Notes

For exterior walls that are adjacent to the outside of the property, where typically only the interior side has measurement data, an estimation of the exterior wall thickness (as directly measured at the property) is used to calculate its footprint. Considerations are not made for varying wall thickness along the perimeter.

Disclaimer

All dimensions and floor areas must be considered approximate and are subject to independent verification.
