Solar Panel Cleaning	Solar panel cleaning & Inspection - 1 story - 65 panels	65	\$747.50
----------------------	---	----	----------

Service Includes:

1. We use deionized/demineralized water only. The use of water purified in these methods removes mineral ions including, calcium, iron, copper, and anions such as chloride and sulfate. To effectively maximize system longevity and performance, routine cleaning is necessary and counteracts the overall reduction in solar panel generation capacity that dirty panels can cause.
2. To achieve optimal results, we use a water fed pole and a soft brush to safely scrub the panels leaving them spot-free and keeping them cleaner for extended periods of time.
3. We visually inspect each panel for any cracks or damage and the mounting frames to verify that all electrical wiring is intact and functioning properly.
4. We visually inspect for any signs of damage from birds/pests that may be nesting under your solar panels.
5. We provide you with before and after photos of the actual panels. All photos along with a copy of your receipt will be e-mailed to you when service has been completed.
