<input type="checkbox"/> Wet areas	<input type="checkbox"/> Unusual green/lush vegetation
<input type="checkbox"/> Liquid discharges to surface	<input type="checkbox"/> Discharge pipe of unknown origin
<input type="checkbox"/> Localized surface settling	<input type="checkbox"/> Other (described above)
Based on a visual evaluation only – Is system working properly? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	

If tank is being opened and pumped please answer the following questions:

Septic Tank Material <input checked="" type="checkbox"/> Concrete <input type="checkbox"/> Fiberglass <input type="checkbox"/> Other
Liquid level in tank <input checked="" type="checkbox"/> Normal <input type="checkbox"/> Below normal <input type="checkbox"/> Above normal
Access openings in tank <input type="checkbox"/> One <input checked="" type="checkbox"/> Two <input type="checkbox"/> Three <input type="checkbox"/> Four <input type="checkbox"/> None.
Number of risers <input checked="" type="checkbox"/> One <input type="checkbox"/> Two <input type="checkbox"/> Three <input type="checkbox"/> Four <input type="checkbox"/> None
Condition of baffles and/or sanitary tees: 3” inlet and 3” outlet.
Inlet baffle or “T” <input checked="" type="checkbox"/> Present and functional <input type="checkbox"/> Not Functional <input type="checkbox"/> None Present <input type="checkbox"/> Not visible
Outlet baffle or “T” <input checked="" type="checkbox"/> Present and functional <input type="checkbox"/> Not Functional <input type="checkbox"/> None Present <input type="checkbox"/> Not visible
Tank was pumped? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No (if no, explain under comments)
Is tank adequately sized for # of bedrooms? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not applicable # of Bedrooms Choose an item.
System working properly at time of inspection? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

Septic systems are subterranean; therefore, it is impossible to determine their overall condition. Also, when no water is entering the field lines, i.e., if the house is vacant, a determination of their status is difficult. No prediction can be made as to when or if a system might fail. This report comments on the workability of the system on the day of the inspection only and is in no way intended to be a warranty. Workability can alter by factors such as excessive rainfall, heavy water usage, faulty plumbing, neglect or physical damage to the system. All tanks require pumping maintenance.
