Re: 39735 Desert Sun Drive Solar System

This letter is to inform you that the system at 39735 Desert Sun Drive was not installed by Hot Purple Energy. Hot Purple Energy did however perform service work on this system back in 2018 to include the replacement of two faulty inverters for two new inverters. Each inverter includes a 5-year manufacturer's warranty.

As of September 2018, these are the system specifications:

- System Size: 10.39 kW
- 63 Sharp NE-165U1 Solar Panels (installed by others)
- 2 SMA America SB5.0-US Inverters (installed by Hot Purple Energy)

If an inspection of the system is needed, Hot Purple Energy is happy to provide that service for a fee.

Sincerely,

The Team at Hot Purple Energy
